23d. Sub- Task No.	23e. Sub-Task Description	*23f. Date	*23g. Status	23h. Outputs/Deliverables	*23i. Remarks
					NWIFC developed a
					communication/outreach plan for
					FY10 and FY11 that consisted of:
					(1) a transmittal note for the RFP;
					(2) a mailing distribution list that
		1.14.11, 7.12.11,		Communication/outreach	ensured that all eligible entities
1.1	Communication/outreach plan	6.22.12	COMPLETED	plan	were notified equitably, timely,

					and thoroughly; and (3) a target
					date for releasing the RFP.
					D 4
					Due to our previous interactions and current relationships with our
					member tribes, we had in place a
					Puget Sound Tribes distribution
					list that contained pertinent tribal
					contacts. We vetted this
					distribution list to ensure that the proper contacts were included
					and additionally amended the list
					to include contacts from the two
					non-member tribes and two tribal
					consortiums. We have continued
					to add to this distribution list as needed and requested.
					NWIFC developed the final FY10
					RFP through close consultation
					with the EPA, utilizing and editing
					the FY08 RFP to finalize the
					FY10's fundamental components and timeline. Additions to the
					FY10 RFP included: (1) language
					that fully described the intent of
					these funds; (2) requirements for
					all projects that collect
					environmental data to have a QAPP in place prior to data
					collection; and (3) logic model
					terminology. While we didn't
					include the traditional logic model
					table format, we utilized the logic
					model terminology to request specific outputs and outcomes
					per task.
					The FY10 RFP was then used as
					a template to develop subsequent
					fiscal year RFPs. Additions to the FY11 RFP included: (1) adding
					PSP Ecosystem Recovery
					Targets as eligible activities under
		1.25.11, 7.15.11,			this award; (2) a request to
1.2	RFP development and distribution	6.22.12	COMPLETED	Final RFP distributed	describe how the potential

					impacts of climate change will be addressed in the planning and implementation of the subrecipient project; and (3) additional guidance regarding the information needed in the budget narrative, including a task delineated budget appendix. In consultation with the EPA Project Officer, we finalized the proposal review process and timeline. Additions to the FY12 RFP of note included: (1) clarifying language that delineated
					differences between subcontracts and professional services within the budget narrative section; and (2) adding a category within the narrative section that required an explanation of how technical review was going to occur for major techincal products of the subrecipient workplan. This provision on technical review was included to reflect and satisfy a new term and condition of NWIFC's contract that NWIFC and the EPA project officer collaboratively discussed and agreed upon.
					As planned, we distributed the final RFP for FY10 on 1.25.11, for FY11 on 7.15.11, and for FY12 on 6.22.12.
					NWIFC developed a coordination plan that can be executed throughout the project period and includes: (1) ensuring that the PSP is aware of the aims and activities of the subrecipient
1.3	Coordination plan	1.31.11	COMPLETED	Coordination plan	projects by enlisting them as a key reviewer of these subawards;

		(2) engaging the EPA Project Officer to discuss the capacity awards that the subrecipient projects are concurrently receiving, in order to avoid duplicative funding efforts; (3) engaging in existing processes and groups to disseminate and share subrecipient project information, including the ECB, the Leadership Council, the PSP Salmon Recovery Council, and the PSP/Federal/Tribal Caucus; (4) participating in LO meetings to ensure that other LOs are fully award of our subrecipient projects and vise versa; (5) an existing NWIFC website that is dedicated to information related to Puget Sound Partnership and Treaty Tribes of Western Washington.

					For FY10 and FY11, NIWFC has
					received, documented, and
					shared input from the NWIFC,
					EPA, and PSP review teams with
1					all 21 subrecipients.
1					F F)/42 NIMIFO h
1					For FY12, NWIFC has received
1					and documented proposals from
1					all 21 subreceipients. Of the non- contracted subrecipient proposals,
1					there are currently 6 subrecipient
					proposals that are in various
1					stages of review. There are
					currently: 2 proposals that NWIFC
1					is still working with our tribes in
					the pre-review process; 1
					proposal that is being reviewed
					externally by the EPA and PSP; 1
					proposal that are being revised by
					the tribe to incorporate and
					address reviewer comments; and
					2 proposals that have been
					revised by the tribes and the
					Projects Coordinator is currently
					reviewing to assess how the
					proposal incorporated/addressed
					review comments.
					For FY10 and FY11, NWIFC has
					successfully communicated with
					all 21 subreceipients to address
					key input and all final workplans
					have been received, approved,
					and awarded. For FY10, 65% of
					funds were awarded by 5/19/2011
					and 100% of funds were awarded
					by 8/2/2011. For FY11, 65% of funds were awarded by 2/9/12
					and 100% of funds were awarded
				Final workplans	by 7/12/12.
				addressing key input	by 1/12/12.

					adherence; review of funds spent
					and/or high award balances, if
					applicable; and subrecipient questions regarding award
					conditions, including proposal,
					review, and reporting requirements)
					. ,
					All site visit reports are held at NWIFC and are available upon
					request.
				Exchange of project lists between LOs;	NWIFC continued to: (1) engage the PSP as a key reviewer of
				Update of the	these subawards; (2) meet with
				PSP/NWIFC website to include subaward	the EPA Project Officer to discuss relevant capacity awards of the
		4.1.11, 1.10.12,		project descriptions and	subrecipients to ensure funding
3.3	Execute coordination plan	1.17.13	CURRENT	progress reports, as	duplication did not occur; (3)

		they become available; Other coordination activities to be developed in consultation with EPA PO	participate in ECB, Leadership Council, PSP Salmon Recovery Council, and PSP/Federal/Tribal Caucus meetings, as possible given the departure of the Puget Sound Policy Analyst; (4) participate in scheduled LO meetings and disseminate a list of subrecipient projects for FY10, FY11, and FY12; and (5) update the PSP/NWIFC website to include meeting notes for ECB, Leadership Council, PSP Salmon Recovery Council, and PSP/Federal/Tribal Caucus meetings, as possible given the departure of the Puget Sound Policy Analyst. For FY10, the subrecipient project list was presented to other LOs and interested parties at the PSP Ecosystem Coordination Board meeting on 4.1.11. For FY11, the list was sent to the LO Coordinator's listserve on 1.10.12. For FY12, the list was presented and shared with the LO Coordinator's listserve on 1.17.13 during an ECB meeting. The FY12 list and associated materials
			and interested parties at the PSP Ecosystem Coordination Board meeting on 4.1.11. For FY11, the list was sent to the LO Coordinator's listserve on 1.10.12. For FY12, the list was presented and shared with the LO Coordinator's listserve on 1.17.13
			subrecipient project lists have also since been posted online to the PSP/NWIFC website so that they are available in an easily accessible format for the public and interested parties. All FEATS and applicable attachments, once approved, continue to be posted online (in

					conjunction with their project description) to the Tribal Project Updates section of the PSP/NWIFC website. Administration of the program, including periodic progress review, has been coordinated by the Projects Coordinator, under the tutelage of the Salmon Recovery Projects Coordinator. NWIFC continues to be in close contact with NWIFC's EPA Project Officer, engaging in regular check-ins to clarify EPA proposal reviews and discuss challenges faced within the review process. The EPA Projects Officer continues to be extremely helpful, proactive, and communicative during the entirety of this award process. The LO reporting requirements were successfully met for the reporting periods of 4.1.11 - 9.30.11, 10.1.1 - 3.31.12, and 4.1.12 - 9.30.13. The LO reporting
3.4	Reporting and adaptive management	11.30.11, 4.20.12, 10.31.12, 4.30.13	CURRENT	LO reporting requirements fulfilled; quarterly check-in meetings/calls with EPA PO	9.30.11, 10.1.1 - 3.31.12, and

Puget Sound tribes; and also provided presentations to the Puget Sound Partnership boards on behalf of NWIFC's Lead Organization.	The new Puget Sound Policy Analyst was hired on 3.25.13 and is currently fufilling the duties of this position to communicate and share Puget Sound information with Puget Sound tribes. If the PSP Management Conference engagement schedule is repeated for the FY13 workplan development, then the Puget Sound Policy Analyst will be able to partner with the Projects Coordinator to meet this commitment.

HIGHLIGHTS/LESSONS LEARNED/REFLECTIONS

*25

(1) HIGHLIGHT: While all 21 subrecipient proposals contain projects that will and are substantially contributing to the restoration and protection of Puget Sound, we have chosen to highlight the progress of the following subreceipient projects. Additional tribal project accomplishments are in the process of being reported to NWIFC for this reporting period. Once NWIFC has reviewed and approved subrecipient FEATS reports, due to NWIFC on 4/30/13, they will be posted online to the PSP/NWIFC website (http://blogs.nwifc.org/psp/).

Suquamish Tribe (FY11) - Chico Creek Riparian Acquisition and Protection: The Suquamish Tribe, in partnership with the Mountainers Foundation, successfully aquired and permanently protected for conservation 70 acres of stream and riparian lands adjacent to highly productive salmonid spawning and rearing habitat in the Chico Creek Watershed. This acquisition increased the Foundation's current ownership in the Chico watershed to a total of 414 acres. The Foundation will manage this land for conservation and natural forest succession such that over time, past effects of forest practices will be ameliorated.

Upper Skagit Indian Tribe (FY10) - An inventory and assessment of hydromodified bank structures in the Upper Skagit and Sauk River watersheds: The Upper Skagit Indian Tribe has successfully completed field surveys for the Chinook tributaries in the Skagit above the Sauk River, the upper Skagit River mainstem above Sauk, and the Sauk River watershed within the Chinook spawning range. The post processing of the GIS field attributes are currently being conducted. The Tribe has found that one of the most valuable lessons to date on the hydromodified bank inventory is the amount of habitat impacts (loss of floodplain channels) they have documented in the tributaries where they have surveyed. Previous efforts to quantify hydromodified impacts only focused on large mainstem sections and with this new data, they will now be able to begin planning restoration work in tributaries where they never previously had basin wide information to consider.

Squaxin Island Tribe (FY10) - Biological Recovery of Coho in the Deschutes Watershed: As part of their FY10 project, Squaxin Island Tribe is engaging in an Instream Flow Protection project in which they are calculating the relationship between summer streamflows, usable fish habitat, and the period of hydrologic record preparation for negotation and adoption of summer minimum flows through rulemaking by DOE. The technical work on this project is moving forward nicely and will be picking up during the summer months as instream flow data are evaluated. The adoption of summer minimum flows will allow assessment of one of the high level indicators proposed to evaluate the success of Puget Sound Restoration efforts - the number of days in July and August when steamflows fall below administrative minimums.

Port Gamble S'Klallam Tribe (FY10 & FY11) - Nearshore Early Marine Juvenile Salmonid, Forage Fish, and Marine Biodiversity Study: The Port Gamble S'Klallam Tribe has completed two field seasons of surface trawling, hydroacoustic surveys, and beach seining. All work was successfully implemented and the data collected has clearly demonstrated the importance of the nearshore environment for chum salmon outmigration from the Hood Canal and is expected to be particularly informative in respect to describing Hood Canal salmonid distribution. The Tribe is currently analyzing their data and by July 2013 will be producing acoustic data maps illustrating fish densities with estimated species composition based off surface trawl and beach seine data, salmonid condition factor values by sample station, and temporal CTD data plotted by sample station.
(2) REFLECTION: We continue to enjoy and highly value our good working relationship with the EPA and our project officer. Continued and consistent funding for these high priority tribal projects is of the utmost importance to Puget Sound restoration and protection and we look forward to continuing to work with the EPA in current and future fiscal years in supporting our tribes and Puget Sound health.
